

WATER QUALITY IMPROVEMENTS COMING SOON

Construction of the over 6-mile pipeline connecting Missouri American Water's water supply to Eureka is nearly complete. Beginning in November, customers will transition to the water supply that is currently serving our St. Louis County customers.

Learn more about the latest project details and search for your address using an interactive map by visiting missouriamwater.com > News & Community > Local Projects >

Eureka Pipeline or scan the QR code.

St. Louis, MO 63141

WHAT YOU NEED TO KNOW ABOUT YOUR NEW WATER SUPPLY

- The new water supply will be distributed in phases beginning in November and continuing through spring.
- We will work as quickly as possible to complete the transition, however variables like weather or water service disruptions may create delays.
- Additional details on the specifics of the timeline will be provided through our customer alert system. System flushing by pressure zone will occur as the water supply is transitioned. Customers will be notified of this schedule.
- Our notification system will be utilized to inform impacted customers of upcoming work, including the transition of water supply and when flushing of water mains will take place in their neighborhood. Upon completion of the flushing, customers will receive the same high-quality water provided to our customers within St. Louis County.

SIGN UP TO RECEIVE NOTIFICATION VIA ALERTS BY UPDATING YOUR CONTACT INFORMATION & PREFERENCES

STEP 1: Log in to or sign up for MyWater at amwater.com/mywater.

STEP 2: Click the **Edit Info** button.

STEP 3: Click the **Change** button under Alert Settings.
